
BRAKE CALIPER REPAIR KITS

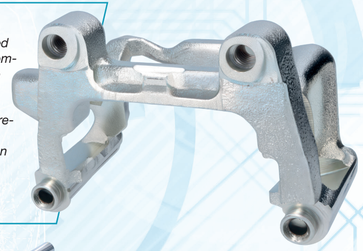
RAP BRAKES calliper repair kits are high-quality sets designed for the refurbishment of brake callipers in passenger cars and commercial vehicles. Made from durable materials resistant to high temperatures, brake fluid, and corrosion, they ensure system integrity and proper calliper operation.

Their precise construction guarantees easy installation and a perfect fit according to factory specifications. RAP BRAKES repair kits offer an economical and effective solution for professional brake system repairs.

BRAKE CALIPER BRACKETS

RAP BRAKES calliper brackets are robust, precision-engineered brake system components designed for passenger cars and commercial vehicles. They ensure the proper guidance of the brake calliper and the stable operation of the entire braking system.

Manufactured from high-quality, corrosion-resistant, and heat-resistant materials, they guarantee long-lasting durability and operational safety. RAP BRAKES brackets are a reliable solution for the professional repair and refurbishment of brake systems.



LUBRICANTS

RAP BRAKES synthetic lubricant is a colourless, odourless, and chemically inert lubricant designed for use on metal connections, plastic components, and rubber parts.

It provides effective protection against corrosion, seizing, and the effects of moisture. Thanks to its hydrophobic properties, it is resistant to being washed away by water and can perform reliably even under demanding operating conditions and high thermal loads. It is also resistant to oils, as well as acidic, alkaline, and saline solutions.

Rap Brakes

RAP BRAKES BRAKE SYSTEM COMPONENTS

RAP BRAKES provides comprehensive solutions for brake system components, which are crucial for driving safety. The entire RAP BRAKES range includes over 9,000 items, serving as an excellent alternative to popular brands in the aftermarket. All RAP BRAKES products are characterized by superior quality and attractive pricing, making them a preferred choice among mechanics.

The production process is preceded by rigorous research and quality testing under strict technical standards, allowing us to confidently recommend RAP BRAKES products to our customers.

BRAKE DISCS

RAP BRAKES offers a range of brake discs for popular vehicle makes, with over 1,000 references available. A key detail for buyers is the estimated service life of the discs, which—under normal driving conditions—is approximately twice that of the brake pads.
RAP BRAKES brake discs are manufactured from high-grade G3000 ASTM cast iron. The DTV (Disc Thickness Variation) value, which ensures the highest standard of geometric precision, is kept to a maximum of 0.015 mm. The product range also includes brake discs coated with Geomet, which provides corrosion protection and eliminates the need for degreasing prior to installation.

Production standards include a lateral runout of ≤0.05 mm and a balancing tolerance of ≤216 g·cm.
The brake discs are IATF quality certified.

BRAKE PADS

RAP BRAKES asbestos-free brake pads are characterized by low dust generation. According to the manufacturer, their quality is comparable to that of original equipment (OE) brake pads used in popular vehicle models; consequently, our range includes 1,600 different product references. This quality is verified by R90 and IATF certifications. Depending on the specific type, the brake pads may be equipped with either electrical or mechanical wear sensors.

To ensure a comfortable driving experience, RAP BRAKES brake pads feature anti-vibration shims; thanks to their three-layer structure, these shims prevent the occurrence of unpleasant squealing noises during braking.

ABS SENSORS AND BRAKE PAD WEAR SENSORS

The RAP BRAKES product family includes over 800 types of ABS sensors and more than 240 brake pad wear sensors, designed for use in ABS, ASR, ESP, and other systems. These sensors are IATF certified.

BRAKE DRUMS

These components must enable rapid braking while maintaining vehicle control. It is therefore crucial that they are selected correctly and installed with precision. The RAP BRAKES range includes an excellent selection of over 150 brake drums.

Sample references:
R-E0017, R-E0124

BRAKE CALIPERS

The RAP BRAKES range of brake callipers includes both traditional models and versions for vehicles equipped with an electric parking brake. A significant advantage for both types is that no core deposit is required at the time of purchase. They are manufactured from durable aluminium or cast iron. Our experience shows that the performance parameters of RAP BRAKES callipers are comparable to those of global industry leaders. This is confirmed by IATF certification and successful quality tests covering leak-tightness, durability, and the quality of the materials used in production.

BRAKE PAD AND SHOE FITTING KITS

These kits contain the essential components—such as springs, clips, and pins—required for a comprehensive replacement of brake friction components. It is recommended to use a new fitting kit every time brake pads or shoes are replaced, as this ensures trouble-free, long-lasting performance. Our range includes over 400 kits for brake pads and more than 230 for brake shoes.

R-T0029, R-T0004

BRAKE FLUIDS AND CLEANERS

High-quality brake fluid is essential for achieving 100% performance from a vehicle's braking system. It is one of the most critical automotive operating fluids. Our product range includes the standard RAP BRAKES DOT 4 brake fluid, as well as a version for more demanding drivers: RAP BRAKES DOT 5.1.

Sample references:
R-LPH1 1,0L, R-LPH05 0,5L, R-LPH5 5,0L

The RAP BRAKES product range is complemented by a universal aerosol brake cleaner. Based on a solvent (petrol-type) formula, it effectively cleans and degreases brake system components and tools. It is safe for use on metal parts and rubber.

R-LZH05, R-LZH5

BRAKE HOSES

The RAP BRAKES range of flexible brake hoses includes over 1,300 reference numbers. They are manufactured using metal components and EPDM synthetic materials, meeting SAE J1401 standards. Their high-quality construction ensures an extended service life.

Sample references:
R-H0018, R-H0046, R-H0764, R-H0769

BRAKE SHOES AND WHEEL CYLINDERS

The RAP BRAKES assortment includes over 300 reference numbers for wheel cylinders and over 350 for brake shoes. They are manufactured from cast iron or aluminium, in accordance with the manufacturer's specifications.

The wheel cylinders are IATF certified.
